Outcome of session:
1. Determine what makes a good presentation
2. Develop good presentation skills
3. Develop a standard presentation template

Assessment:
There are no assignment assessment tasks components in this studio

Preparation required:
Working copies of the VB activity from week 9, and html activity from week 8

Activity 1: Presentation preparation (40 minutes)
*Individual or group* (same as week 8 and 9)
1. You are to prepare a 10 minute presentation using presentation software, laptop and data projector for the two applications developed for the research conducted into HCI theories and principles. Include the following:
   a. Development plan – standards and templates
   b. Presentation plan – running sheet for presentation

Activity 2: Class presentations (2 hours)
*Individual or group*
1. 10 minute presentation using presentation software, laptop and data projector.
2. The presentations will be videoed and feedback will be given by the tutor and academic.
3. Each student in the audience is to write an honest and constructive critique of class mates’ presentations.

The remainder of time is to be spent working on the presentation component of the IMS1502 assignment.
