### TOPIC: WEEK 10 – WEBCAST PRESENTATION

**Learning outcomes:**
- Explaining and defining new topics as outlined in the webcasts
- Summarise information to explain details to an audience

| 30 mins    | Webcast | The following is based on the webcasts shown on page 2 of this worksheet: You have been asked to view a range of webcasts to replace the lecture. In your groups please present details from one of the following webcasts to the class: Each group has five minutes and each member must contribute to the presentation by taking one part of the presentation each:  
1. The presentation will be in the form of ppt slides placed on overhead transparencies  
2. The presentation should consist of: an out line of the webcast. Marks will be given for the following:  
   - Introduction to the webcast (.5)  
   - Definition of any topics (1 mark)  
   - Main learning outcomes and explanation of these (1 mark)  
   - How the topics contribute to IS security (1 mark)  
   - Conclusion (1 mark)  
   - Presentation (.5)  
   Does the student know the topic  
   Does the presentation indicate the student downloaded and watched the presentation |

Webcasts are shown on page 2 and come from: Computer Security Institute (CSI) USA:

I will prepare a very simple checklist to ensure the students comply with the requirements. This is a hurdle requirement for students.

Presentations 7 and 8

**ASSIGNMENT 2:** due for hand in Friday of Week 11. The week following semester break
• **Establishing a Phishing Response Strategy: A CSI Editorial Perspectives TechWebCast**  
  Wednesday, September 28, 2005  
  9:00 AM PT / 11:00 AM CT / 12:00 PM ET  
  Every corporation should have a strategy to protect against phishing attacks and to react to attempts. In this presentation will we discuss how to best protect your corporation and show how a successful program was developed and implemented.

• **Penetration Testing: Taking the Guess Work out of Vulnerability Management: A CSI and Secure Enterprise Editorial Perspectives TechWebCast**  
  Thursday, September 8, 2005  
  1:00 PM PT / 3:00 PM CT / 4:00 PM ET  
  Simply identifying potential problems on your network and systems is no longer good enough. As a security or network professional, you must know the real risks and implications of vulnerabilities and regularly test the effectiveness of your network defenses. This TechWebcast will show you how penetration testing software can efficiently and easily help you address these challenges.  
  [View the Webcast](#)  

• **Best Practices in Approaching Patch Management**  
  Tuesday, May 19, 2005  
  Learn about the operations and security process of patch management. Develop strategies about software and configuration management lifestyle and overcome your patch management challenges.  
  Featured Speakers: Bill Stackpole, Engagement Manager, Microsoft Corporation Chris Andrew, Vice President of Product Management, PatchLink Corporation  
  [View the Webcast](#)  

• **Handheld Device Security Webcast**  
  Tuesday, May 3, 2005  
  Join Burton Group and CSI to learn more about the threats associated handheld devices and the solutions that will help you properly manage risk. Webcast attendees will also gain a better understanding of the complexity of handheld devices and how it equates to risk.

• **31st Annual Computer Security Conference - Selected Sessions**  
  November 14 -16, 2004  
  Frank Abagnale  
  The Information Security Experience - Marianne M. Emerson  
  Risk Management for Security and Business - Thomas Pettier  
  Spooks in the Machine: Spyware and Adware Threats and Countermeasures - Fred L. Trickey  
  Economic Aspects of Cybersecurity - Dr. Lawrence A. Gordon  
  Breaking Wireless Security - Aaron Earle  
  Security Trends from the Practitioner's Perspective - Terri Curran  
  Security and Outsourcing - John O'Leary  
  Host Intrusion Prevention: Defining a Strategy and Choosing a Solution - Roger Fradenburgh  
  Information Security Executive (ISE) of the Year National Award 2004  
  [View the Webcasts](#)  

• **Measuring What You Have, Knowing What You Need**  
  Wednesday, October 27, 2004  
  Learn how to design a security program with measurable objectives and a strategic plan. Hosted by Robert Richardson & Hugh Voigt, President & CEO, Espiria.  
  [View the Webcast](#)  

• **Defending Your Network: IDS, VPN and Web Content Filters**  
  Tuesday, October 19, 2004  
  Defending your network from all of the worms, viruses and unwanted access is a full time job. So what does a system administrator need to defend the network they are responsible for?
