Individual assignment

In what way did the application development for the Internet change modelling?

Write a 2000 – 2500 word discussing this issue. The report should refer to the following:

- Theory about modelling and methodologies
- How does it relate to the idea that information systems development is social or technical?
- What are the problems?

Basic starting point

- Lecture 2 reading list (Mathiassen et al. and Hirschheim et al.)
- Andrew Dixon from the library
- Proquest
