

### Marking the paper

1. Answers to questions plausible supported by evidence in paper? (2 marks)
2. Evidence of 'critical thinking' not just summarising the article
  - Evidence of reflection on implications of issues/problems in real world?
  - Students opinions on issues arguments raised must be justified
  - Evidence of use of other material. (3)

### Assignment 1 - 25% (4000 - 5000 words)

- Due Date: 7th April, 2006 - Individual assignment.
- **Purpose:** explore development techniques for developing systems with a strong HCI focus.
- **Requirements:**
  - select one development technique discussed in lectures
  - select website from list and use it to describe how you would apply your selected methodology to a redesign of the web site system up to the point of user evaluation.
  - compare technique with the SDLC drawing on the selected website as an example.
  - focus on similarities and differences between the two techniques emphasising the elements that would produce a better system

---

---

---

---

---

---

### Requirements cont'd

- Provide detailed description of selected development methodology
- Justify choice drawing on relevant literature. This will relate to the website you have selected.
- Provide detailed critical comparison of selected methodology against SDLC. Use literature to support the comparison.
- Provide description of how the methodology will be used and the people involved. Relate to the website you have selected.
- Please also note that the purpose of this assignment is not to conduct a review of the listed web sites. The businesses and their websites are merely to provide you with a context in which to consider an appropriate development methodology and to describe an appropriate approach to a redesign of that website.
