Objective of session

- To conduct a walkthrough of your system interface as a component of your assignment 2 submission.
- To begin to plan and work on assignment 3.

Assessment

This system interface walkthrough will be used in the assessment of your assignment 2 submission.

Activity 1 – System Interface Walkthrough [20-30 mins per team]

Each team, one at a time, will make a presentation of their system interface to their tutor and academic. In this presentation you will be expected to show the major interfaces of your system and to explain how they will be used to help users perform the major events that the system has been design to support.

Activity 2 – Relational data model design [Remaining time]

Read the requirements for Assignment 3 if you haven’t already and first, begin to plan the work required for that, and then begin to do that work. Your academic and tutor will be able to clarify any aspect of the task that you aren’t sure about.

Activity 3 – Reflective Journal Entry [15 mins]

Send an email to your tutor and studio academic with subject heading "IMS2501 Reflective Journal Entry – Student ID ". See Sections 9.1 and 9.2 for sample and template of Reflective Journal Entry.

Preparation for next week

- Just keep working on your project and the upcoming submissions (3 and 4).
