| 1 Risk assessment:  
   a. Risk assessment method described in detail  
      This should be either:  
      developed using an appropriate methodology (include references) or  
      developed from a variety of sources – this should be clearly explained and  
      appropriate references used  
   b. Clearly labeled process diagram supporting the risk method  
      Feedback loops are an essential part of this diagram and must be clearly  
      labeled  
      Links clearly with the method used  
   c. Well articulated discussion on the reasons for developing/choosing the  
      particular method  
      Must include benefits  
      Must include any disadvantages or other issues that should be considered | 20
