Assessment Guidelines

The following factors will be considered as part of the assessment process.

Organization of Presentation
- the presentation sequence should follow a logical path

Clarity of Presentation
- the points being made should be clearly understandable
- the connections being made between causes and effects should be clear
- the conclusions drawn should be clear

Quality of Case Analysis
- identification of relevant factors
- any distinctions made between key and peripheral points should be clear
- the explanations for outcomes should be plausible and persuasive
- conclusion should be related to the arguments presented

Presentation of Role Perspective
- representation of own role’s interests
- representation of other parties’ activities
- justification of own role’s behavior

Clarity of Written Submission
- should be consistent with presentation
- should support the presentation overheads with appropriate extra detail.
